

Alpha V2 Driver Receives "Best of the Best" Award

- Rankmark.com

Winner of the 2003 PGA Merchandise Show for "Best New Driver", the Alpha Version 2 Driver, has grabbed mainstream attention by winning one of the "Best of the Best" awards for excellence by Rankmark (www.rankmark.com). Over 300 golfers of various skill levels tested the Alpha Driver. Both distance and dispersion were the key criterion in ranking the driver. The Alpha Version 2 425cc driver features a deep-face design and a superior two-piece Titanium construction that yields the highest Coefficient of Restitution (COR) allowed by the USGA. The high-polished, black finished driver features a "blacked-out" face that provides instructional "point of impact" marks.

"In our latest Rankmark test, we started with **over 44 different models of drivers**. We used over 300 golfers of various skill levels to test each club. While we measure both distance and dispersion and rank the clubs accordingly, our testers simply select which he or she likes best and in what order. Once we count all the votes, we award the following top vote getters plus ties (within 5%) with the Rankmark "**Best of the Best**" award for excellence."
